CANADIAN JOURNAL OF BIOCHEMISTRY

JOURNAL CANADIEN DE BIOCHIMIE

VOLUME 59, 1981

Author Index / Index des auteurs

Adapoe, C.
Energy coupling mechanisms in host-grown *Mycobacterium lepraemurium*
M. Ishaque, C. Adapoe, and L. Kato 75

Aghion, J.
Interactions of CF_1, the coupling factor of photophosphorylations, with chloroplast lipids. Monolayers studies
Huguette Dijkmans, Gaëtan Munger, Jacques Aghion, and Roger M. Leblanc 328

Ahmad, F.
Stability of acetylcholinesterase in guanidine hydrochloride solution
Faizan Ahmad 551

Alaupovic, P.
David Rubinstein Memorial Lecture: The biochemical and clinical significance of the interrelationship between very low density and high density lipoproteins
Petar Alaupovic 565

Al-Jobore, A.
Phospholipid and calmodulin activation of solubilized calcium-transport ATPase from human erythrocytes: regulation by magnesium
Ameera Al-Jobore and Basil D. Roufogalis 880

Angel, A.
Exchange of free cholesterol between low density lipoproteins and human adipocytes
A. Angel, R. Yuen, and J.A. Nettleton 655

Angel, A.
Composition and metabolism of very low density lipoproteins in dog cardiac lymph
P. Julien and A. Angel 709

Araiso, T.
Kinetic analysis of compound I formation and the catalatic activity of chloroperoxidase
Tsunehisa Araiso, Rick Rutter, Monica M. Palcic, Lowell P. Hager, and H. Brian Dunford 233

Baker, R.R.
The acylation of 1-acyl-*sn*-glycero-3-phosphorylcholine by glial and neuronal nuclei and derived neuronal nuclear envelopes: a comparison of nuclear and microsomal membranes
R. Roy Baker and Huu-yi Chang 848

Banoub, J.H.
Isolation and characterization of 3-acetamido-3,6-dideoxy-L-glucose from the core oligosaccharides obtained from the aquatic gram-negative bacteria *Aeromonas hydrophila* and *Vibrio anguillarum*
Joseph H. Banoub and Derek H. Shaw 877

Barden, N.
Inhibition of anterior pituitary prostaglandin-stimulated adenylyl cyclase activity by somatostatin
Dominique Rouleau and Nicholas Barden 307

Bégin-Heick, N.
Differential response of adenylate cyclase to β-adrenergic agonists in white adipocyte membranes from lean and obese (ob/ob) mice
Nicole Bégin-Heick 816

Behrisch, H.W.
Regulation of enzyme activity in the hibernator. A kinetic and spectroscopic study of muscle pyruvate kinase from the Arctic ground squirrel
George A. Morse and Hans W. Behrisch 762

Belleau, B.
An investigation of the destruction of the β-lactam ring of penems by the albumin drug-binding site
H. Bruderlein, R. Daniel, D. Perras, A. DiPaola, A. Fidelia, and B. Belleau 857

Bendiak, B.
The specificity of sialyltransferase activity in smooth membrane fractions of embryonic chicken liver
Brad Bendiak and Sara E. Zalik 171

Bird, R.C.
Tubulin synthesis during the synchronous cell cycle of *Tetrahymena*
R. Curtis Bird and Arthur M. Zimmerman 937

Blakeley, R.L.
Erratum: Jack bean urease (EC 3.5.1.5). V. On the mechanism of action of urease on urea, formamide, acetamide, *N*-methylurea, and related compounds
Nicholas E. Dixon, Peter W. Riddles, Carlo Gazzola, Robert L. Blakeley, and Burt Zerner 564

Blue, M.-L.
Differential ontogeny of estrogen responsiveness in the chick embryo liver
A. ELBRECHT, D.L. WILLIAMS, M.-L. BLUE, and C.B. LAZIER 606

Boucher, R.
Formation of angiotensin II by tonin from partially purified human angiotensinogen
C. GRISÉ, R. BOUCHER, G. THIBAULT, and J. GENEST 250

Boucher, R.
Purification and partial characterization of a plasma inhibitor of tonin
J. TREMBLAY, G. THIBAULT, J. GUTKOWSKA, R. BOUCHER, and J. GENEST 256

Bowness, J.M.
Comparison of cartilage structural glycoproteins with matrix proteins and fibronectin
J. MICHAEL BOWNESS 181

Bowness, J.M.
The association of intercellular structural glycoproteins with lipids in canine cartilage
RAVI K. CHOPRA and J. MICHAEL BOWNESS 191

Breckenridge, W.C.
Differential distribution of sphingomyelins among plasma lipoprotein classes
J.J. MYHER, A. KUKSIS, W.C. BRECKENRIDGE, and J.A. LITTLE 626

Bregar, F.W.
Rat renal γ-glutamyltransferase activity: a reaction of glutamine synthetase
FRANK W. BREGAR, REBECCA P. HUGHEY, and NORMAN P. CURTHOYS 54

Bridger, W.A.
The subunits of succinyl coenzyme A synthetase
WILLIAM A. BRIDGER 1

Bronstein, W.W.
Interaction of muscle glycolytic enzymes with thin filament proteins
W.W. BRONSTEIN and H.R. KNULL 494

Brosnan, J.T.
Renal metabolite concentrations and the activities of glutaminase and glutamate dehydrogenase during recovery from metabolic acidosis in the rat
DAVID M. PARRY, BEATRICE HALL, and JOHN T. BROSNAN 871

Brown, G.L.
The similarity of histones from turtle erythrocytes and liver
R.G. RUTLEDGE, C.E. SHAY, G.L. BROWN, and J.M. NEELIN 273

Brown, I.R.
Nuclease sensitivity of postreplicated chromatin from Ehrlich ascites tumour cells
BRIAN L.A. MIKI, JOHN J. HEIKKILA, and IAN R. BROWN 22

Bruderlein, H.
An investigation of the destruction of the β-lactam ring of penems by the albumin drug-binding site
H. BRUDERLEIN, R. DANIEL, D. PERRAS, A. DIPAOLA, A. FIDELIA, and B. BELLEAU 857

Buckley, J.T.
Purification and some properties of the hemolytic toxin aerolysin
J. THOMAS BUCKLEY, L. NICOLE HALASA, KAREN D. LUND, and SHEILA MACINTYRE 430

Campbell, I.M.
Vesicle surface charge and polylysine modification of ultraviolet absorption by the olefinic bonds in charged lipid
ASHA B. PAWAGI and I.M. CAMPBELL 404

Carlo, D.J.
The specific capsular polysaccharide of *Streptococcus pneumoniae* type 9V
MALCOLM B. PERRY, VIRGINIA DAOUST, and DENNIS J. CARLO 524

Carroll, K.K.
Effects of dietary protein on composition and turnover of apoproteins in plasma lipoproteins of rabbits
D.C.K. ROBERTS, M.E. STALMACH, M.W. KHALIL, J.C. HUTCHINSON, and K.K. CARROLL 642

Carter, J.V.
Comparison of the structure and function of ribulosebisphosphate carboxylase–oxygenase from a cold-hardy and nonhardy potato species
NORMAN P.A. HUNER, JIWAN P. PALTA, PAUL H. LI, and JOHN V. CARTER 280

Casola, P.G.
Pulmonary phosphatidic acid phosphohydrolase: further studies on the activities in rat lung responsible for the hydrolysis of membrane-bound and aqueously dispersed phosphatidate
PAUL G. CASOLA and FRED POSSMAYER 500

Cedergren, R.J.
The nucleotide sequence of phenylalanine tRNA and 5S RNA from *Rhodospirillum rubrum*
N. NEWHOUSE, KRIKOR NICOGHOSIAN, and R.J. CEDERGREN 921

Chan, J.Y.
Further characterization of isolated presumptive euchromatin fractions of mouse hepatoma cells utilizing a cDNA probe complementary to the homologous poly(A)$^+$ mRNA
J.D. DUERKSEN, J.Y. CHAN, and B. ROBICHAUD 534

Chan, W.W.-C.
Conformation of cross-linked aspartate transcarbamoylase
WILLIAM W.-C. CHAN 371

Chan, W.W.-C.
Hybrid aspartate transcarbamoylase containing cross-linked subunits
WILLIAM W.-C. CHAN and CAROLINE A. ENNS 461

Chang, H.y.
The acylation of 1-acyl-*sn*-glycero-3-phosphorylcholine by glial and neuronal nuclei and derived neuronal nuclear envelopes: a comparison of nuclear and microsomal membranes
R. Roy Baker and Huu-yi Chang 848

Cherian, M.G.
Site of synthesis of metallothionein in rat liver
M. George Cherian, Sharon Yu, and Colvin M. Redman 301

Chopra, R.K.
The association of intercellular structural glycoproteins with lipids in canine cartilage
Ravi K. Chopra and J. Michael Bowness 191

Chou, K.-C.
A new graphical rule for rate laws of enzyme reactions with branched pathways
Kuo-Chen Chou 757

Clarke, J.T.R.
The glycosphingolipids of human plasma lipoproteins
J.T.R. Clarke 412

Coetzee, G.A.
Metabolism of cytoplasmic triacylglycerol in cultured aortic smooth muscle cells
O. Stein, G.A. Coetzee, and Y. Stein 662

Cornatzer, W.E.
Effects of a methyl-deficient diet on rat liver phosphatidylcholine biosynthesis
Dennis R. Hoffman, Judy A. Haning, and W.E. Cornatzer 543

Curthoys, N.P.
Rat renal γ-glutamyltransferase activity: a reaction of glutamine synthetase
Frank W. Bregar, Rebecca P. Hughey, and Norman P. Curthoys 54

Dalke, P.
Changes in nucleotide pools conidial germination in *Neurospora crassa*
Richard L. Sabina, Paulette Dalke, Alan R. Hanks, Jane M. Magill, and Clint W. Magill 899

Daniel, A.-M.
Binding of the chloroplast coupling factor CF_1 to lipid vesicles
Huguette Dijkmans and Anne-Marie Daniel 16

Daniel, R.
An investigation of the destruction of the β-lactam ring of penems by the albumin drug-binding site
H. Bruderlein, R. Daniel, D. Perras, A. DiPaola, A. Fidelia, and B. Belleau 857

Daoust, V.
The specific capsular polysaccharide of *Streptococcus pneumoniae* type 9V
Malcolm B. Perry, Virginia Daoust, and Dennis J. Carlo 524

Dass, P.D.
Presence of γ-glutamyltransferase in the renal microvascular compartment
P.D. Dass, R.P. Misra, and T.C. Welbourne 383

Davignon, J.
Cholesteryl sulfate: measurement with β-sitosteryl sulfate as an internal standard
Y.S. Huang, K. Eid, and J. Davignon 602

Davis, R.C.
L-Phenylalanine induced changes of sulfhydryl reactivity in rabbit muscle pyruvate kinase
Chiu-Yin Kwan and Robert C. Davis 92

Delahunty, T.J.
The incorporation of choline into disaturated phosphatidylcholine in the microsomal, lamellar body, and surfactant fractions of hamster lung tissue
Thomas J. Delahunty and John M. Johnston 436

Denhardt, D.T.
The mechanism of replication of ϕX174 XVII. Purification and partial characterization of the gene A and A* proteins
Louis Dubeau, Christian Hours, and David T. Denhardt 106

Desautels, M.
Brown adipose tissue mitochondria of cold-acclimated rats: change in characteristics of purine nucleotide control of the proton electrochemical gradient
Michel Desautels and Jean Himms-Hagen 619

Dickie, P.
Cloning and expression of the fumarate reductase gene of *Escherichia coli*
Elke Lohmeier, D. Scott Hagen, Peter Dickie, and Joel H. Weiner 158

Dijkmans, H.
Binding of the chloroplast coupling factor CF_1 to lipid vesicles
Huguette Dijkmans and Anne-Marie Daniel 16

Dijkmans, H.
Interactions of CF_1, the coupling factor of photophosphorylations, with chloroplast lipids. Monolayers studies
Huguette Dijkmans, Gaetan Munger, Jacques Aghion, and Roger M. Leblanc 328

DiPaola, A.
An investigation of the destruction of the β-lactam ring of penems by the albumin drug-binding site
H. Bruderlein, R. Daniel, D. Perras, A. DiPaola, A. Fidelia, and B. Belleau 857

Dixon, N.E.
Erratum: Jack bean urease (EC 3.5.1.5). V. On the mechanism of action of urease on urea, formamide, acetamide, *N*-methylurea, and related compounds
Nicholas E. Dixon, Peter W. Riddles, Carlo Gazzola, Robert L. Blakeley, and Burt Zerner 564

Dolphin, P.J.
Secretion of nascent lipoproteins by isolated rat hepatocytes
Elaine S. Krul, Peter J. Dolphin, and David Rubinstein 676

Dory, L.
Plasma lipids, lipoproteins, and triglyceride turnover in eu- and hypo-thyroid rats and rats on a hypocaloric diet
LADISLAV DORY, BRIAN R. KRAUSE, AND PAUL S. ROHEIM 715

Drummond, G.I.
Mg^{2+} and Mn^{2+} effects on membrane-bound and detergent-solubilized adenylate cyclase
GEORGE I. DRUMMOND 748

Dubeau, L.
The mechanism of replication of ϕX174 XVII. Purification and partial characterization of the gene A and A* proteins
LOUIS DUBEAU, CHRISTIAN HOURS, and DAVID T. DENHARDT 106

Duerksen, J.D.
Further characterization of isolated presumptive euchromatin fractions of mouse hepatoma cells utilizing a cDNA probe complementary to the homologous poly(A)$^+$ mRNA
J.D. DUERKSEN, J.Y. CHAN, and B. ROBICHAUD 534

Dugas, H.
Interaction of selectively spin-labeled 70S ribosomes with $tRNA^{Phe}$. An electron paramagnetic resonance study
ANGEL RODRIGUEZ and HERMANN DUGAS 311

Dular, U.
Cell-free ammonia-oxidizing system of *Nitrosomonas europaea*: general conditions and properties
ISAMU SUZUKI, SIU-CHUN KWOK, USHA DULAR, and D.C.Y. TSANG 477

Dunford, H.B.
Kinetic analysis of compound I formation and the catalatic activity of chloroperoxidase
TSUNEHISA ARAISO, RICK RUTTER, MONICA M. PALCIC, LOWELL P. HAGER, and H. BRIAN DUNFORD 233

Eid, K.
Cholesteryl sulfate: measurement with β-sitosteryl sulfate as an internal standard
Y.S. HUANG, K. EID, and J. DAVIGNON 602

Elbrecht, A.
Differential ontogeny of estrogen responsiveness in the chick embryo liver
A. ELBRECHT, D.L. WILLIAMS, M.-L. BLUE, and C.B. LAZIER 606

Enns, C.A.
Hybrid aspartate transcarbamoylase containing cross-linked subunits
WILLIAM W.-C. CHAN and CAROLINE A. ENNS 461

Eylar, E.H.
Erratum: The PO glycoprotein of peripheral nerve myelin
A. ISHAQUE, M.W. ROOMI, I. SZYMANSKA, S. KOWALSKI, and E.H. EYLAR 74

Fidelia, A.
An investigation of the destruction of the β-lactam ring of penems by the albumin drug-binding site
H. BRUDERLEIN, R. DANIEL, D. PERRAS, A. DIPAOLA, A. FIDELIA, and B. BELLEAU 857

Fletcher, T.
Hydrolysis of triolein, cholesterol oleate, and 4-methylumbelliferyl stearate by acid and neutral ester hydrolases (lipases) from pigeon adipose tissue: effect of cAMP-dependent protein kinase
DAVID L. SEVERSON, THEA FLETCHER, GERALD GROVES, BRENDA HURLEY, and SHELLIE SLOAN 418

Fletterick, R.J.
Regulation of the dephosphorylation of glycogen phosphorylase *a* and synthase *b* by glucose and caffeine in isolated hepatocytes
PETER J. KASVINSKY, ROBERT J. FLETTERICK, and NEIL B. MADSEN 387

Forer, A.
Analysis of chromosome movement in crane fly spermatocytes by ultraviolet microbeam irradiation of individual chromosomal spindle fibres. I. General results
PEGGY J. SILLERS and ARTHUR FORER 770

Forer, A.
Analysis of chromosome movement in crane fly spermatocytes by ultraviolet microbeam irradiation of individual chromosomal spindle fibres. II. Action spectra for stopping chromosome movement and for blocking ciliary beating and myofibril contractions
PEGGY J. SILLERS and ARTHUR FORER 777

Forer, A.
Addendum: Analysis of chromosome movement in crane fly spermatocytes by ultraviolet microbeam irradiation of individual chromosomal spindle fibres. II. Action spectra for stopping chromosome movement and for blocking ciliary beating and myofibril contractions
PEGGY J. SILLERS and ARTHUR FORER 867

Ganz, P.R.
Oligo(A)-stimulated *Tetrahymena* rDNA synthesis *in vitro*
PETER R. GANZ, GYORGY B. KISS, and RONALD E. PEARLMAN 396

Garrick, M.D.
Inhibition of initiation of protein synthesis by tosyl-L-lysyl chloromethyl ketone
MAJAMBU MBIKAY and MICHAEL D. GARRICK 321

Gazzola, C.
Erratum: Jack bean urease (EC 3.5.1.5). V. On the mechanism of action of urease on urea, formamide, acetamide, *N*-methylurea, and related compounds
NICHOLAS E. DIXON, PETER W. RIDDLES, CARLO GAZZOLA, ROBERT L. BLAKELEY, and BURT ZERNER 564

Gellissen, G.
Production of lipophorin in the fat body of adult *Locusta migratoria*: comparison with vitellogenin
GERD GELLISSEN and G.R. WYATT 648

Genest, J.
Formation of angiotensin II by tonin from partially purified human angiotensinogen
C. GRISÉ, R. BOUCHER, G. THIBAULT, and J. GENEST 250

Genest, J.
Purification and partial characterization of a plasma inhibitor of tonin
J. TREMBLAY, G. THIBAULT, J. GUTKOWSKA, R. BOUCHER, and J. GENEST 256

Gilboa-Garber, N.
A new mitogenic D-galactosephilic lectin isolated from seeds of the coral-tree *Erythrina corallodendron*. Comparison with *Glycine max* (soybean) and *Pseudomonas aeruginosa* lectins
N. GILBOA-GARBER and L. MIZRAHI 315

Godbout, R.
Tissue and species-specific effects of small molecular weight nuclear RNA's on transcription in isolated mammalian nuclei
WING-CHEONG LIU, ROSELINE GODBOUT, ERNEST JAY, KENNETH K.-Y. YU, and MARGARIDA O. KRAUSE 343

Goldberg, D.M.
Effects of phenobarbital upon triacylglycerol metabolism in the guinea pig
DAVID M. GOLDBERG, ALEXANDER YU, M. WAHEED ROOMI, and DANIEL A.K. RONCARI 48

Goldberg, D.M.
Enzyme induction and hepatic glycerolipid synthesis in rats treated with 3-methylcholanthrene
D.M. GOLDBERG, M.W. ROOMI, A. YU, and D.A.K. RONCARI 793

Gotto, A.M., Jr.
Thermodynamics of lipid–protein associations: the enthalpy of binding of apo C-III to synthetic phosphatidylcholines
HENRY J. POWNALL, JOHN B. MASSEY, FU-JUAN HSU, and ANTONIO M. GOTTO, JR. 700

Green, P.
Control of fat cell phosphatidate phosphohydrolase by lipolytic agents
F. MOLLER, K.H. WONG, and P. GREEN 9

Greenwood, J.S.
Temperature-induced changes in nuclear pore complex frequencies, nuclear envelope surface areas, and nuclear volumes in light-synchronized *Euglena*
JOHN S. GREENWOOD and JOHN N.A. LOTT 802

Greer, W.L.
Inhibition of adenine and hypoxanthine uptake by guanosine in conidia of *Neurospora crassa*
WENDA L. GREER and ANGELA M. WELLMAN 933

Grisé, C.
Formation of angiotensin II by tonin from partially purified human angiotensinogen
C. GRISÉ, R. BOUCHER, G. THIBAULT, and J. GENEST 250

Groves, G.
Hydrolysis of triolein, cholesterol oleate, and 4-methylumbelliferyl stearate by acid and neutral ester hydrolases (lipases) from pigeon adipose tissue: effect of cAMP-dependent protein kinase
DAVID L. SEVERSON, THEA FLETCHER, GERALD GROVES, BRENDA HURLEY, and SHELLIE SLOAN 418

Gutkowska, J.
Purification and partial characterization of a plasma inhibitor of tonin
J. TREMBLAY, G. THIBAULT, J. GUTKOWSKA, R. BOUCHER, and J. GENEST 256

Haberman, H.F.
Binding of protoporphyrin to melanin and oxidation–reduction properties of melanin–protoporphyrin complex
S. PERSAD, H.F. HABERMAN, and I.A. MENON 269

Hagen, D.S.
Cloning and expression of the fumarate reductase gene of *Escherichia coli*
ELKE LOHMEIER, D. SCOTT HAGEN, PETER DICKIE, and JOEL H. WEINER 158

Hager, L.P.
Kinetic analysis of compound I formation and the catalatic activity of chloroperoxidase
TSUNEHISA ARAISO, RICK RUTTER, MONICA M. PALCIC, LOWELL P. HAGER, and H. BRIAN DUNFORD 233

Hahn, P.
Hepatic microsomal 3-hydroxy-3-methylglutaryl-CoA reductase activity in the lactating rat
BRIAN L. WALKER and PETER HAHN 889

Halasa, L.N.
Purification and some properties of the hemolytic toxin aerolysin
J. THOMAS BUCKLEY, L. NICOLE HALASA, KAREN D. LUND, and SHEILA MACINTYRE 430

Hall, B.
Renal metabolite concentrations and the activities of glutaminase and glutamate dehydrogenase during recovery from metabolic acidosis in the rat
DAVID M. PARRY, BEATRICE HALL, and JOHN T. BROSNAN 871

Hand, R.
DNA binding of a nonstructural reovirus protein
IRIS H. SHELTON, GEORGE J. KASUPSKI, JR., COLETTE OBLIN, and ROGER HAND 122

Haning, J.A.
Effects of a methyl-deficient diet on rat liver phosphatidylcholine biosynthesis
DENNIS R. HOFFMAN, JUDY A. HANING, and W.E. CORNATZER 543

Hanks, A.R.
Changes in nucleotide pools conidial germination in *Neurospora crassa*
RICHARD L. SABINA, PAULETTE DALKE, ALAN R. HANKS, JANE M. MAGILL, and CLINT W. MAGILL 899

Hastings, K.E.M.
Similar sets of terminal oligonucleotides from reovirus double-stranded RNA and viral messenger RNA synthesized *in vitro*
KENNETH E.M. HASTINGS and STEWART MILLWARD 151

Havel, R.J.
Metabolism of apolipoprotein A-I of chylomicrons in rats and humans
JEAN-LOUIS VIGNE and RICHARD J. HAVEL 613

Hay, G.
Tissue distribution of sulfolipids in the rat. Restricted location of sulfatoxygalactosylacylalkylglycerol
CLIFFORD LINGWOOD, GENEVIEVE HAY, and HARRY SCHACHTER 556

Heikkila, J.J.
Nuclease sensitivity of postreplicated chromatin from Ehrlich ascites tumour cells
BRIAN L.A. MIKI, JOHN J. HEIKKILA, and IAN R. BROWN 22

Helfman, W.B.
Divalent cation-activated RNA synthesis in toluene-treated *Escherichia coli*
WILLIAM B. HELFMAN, SHELDON S. HENDLER, and DOUGLAS W. SMITH 511

Henderson, J.F.
Determination of deoxyribonucleoside triphosphates using DNA polymerase: a critical evaluation
DAREL HUNTING and J. FRANK HENDERSON 723

Henderson, J.F.
Effects of altered ribonucleotide concentrations on ribonucleotide reduction in intact Chinese hamster ovary cells
DAREL HUNTING, JOYCE HORDERN, and J. FRANK HENDERSON 821

Henderson, J.F.
Regulation of ribonucleotide reduction by deoxyribonucleotides in intact Chinese hamster ovary cells
DAREL HUNTING and J. FRANK HENDERSON 830

Henderson, J.F.
Quantitative analysis of purine and pyrimidine metabolism in Chinese hamster ovary cells
DAREL HUNTING, JOYCE HORDERN, and J. FRANK HENDERSON 838

Hendler, S.S.
Divalent cation-activated RNA synthesis in toluene-treated *Escherichia coli*
WILLIAM B. HELFMAN, SHELDON S. HENDLER, and DOUGLAS W. SMITH 511

Himms-Hagen, J.
Brown adipose tissue mitochondria of cold-acclimated rats: change in characteristics of purine nucleotide control of the proton electrochemical gradient
MICHEL DESAUTELS and JEAN HIMMS-HAGEN 619

Hnatiuk, O.
Hepatic and intestinal contribution of two forms of apolipoprotein B to plasma lipoprotein fractions in the rat
CHARLES E. SPARKS, OLCH HNATIUK, and JULIAN B. MARSH 693

Hobkirk, R.
Factors affecting the 16α-hydroxylation of estrone 3-sulfate by guinea pig liver microsomes
C.J. TSOULIS and R. HOBKIRK 454

Hoffman, D.R.
Effects of a methyl-deficient diet on rat liver phosphatidylcholine biosynthesis
DENNIS R. HOFFMAN, JUDY A. HANING, and W.E. CORNATZER 543

Holbein, B.E.
A sensitive and convenient assay procedure for transferrin and its application to the purification of mouse transferrin
ELAINE D. LETENDRE and BRUCE E. HOLBEIN 906

Hook, G.E.R.
Extracellular alkaline phosphatase from alveolar secretions of patients with pulmonary alveolar proteinosis
DENIS NADEAU, MARK J. REASOR, and GARY E.R. HOOK 290

Hordern, J.
Effects of altered ribonucleotide concentrations on ribonucleotide reduction in intact Chinese hamster ovary cells
DAREL HUNTING, JOYCE HORDERN, and J. FRANK HENDERSON 821

Hordern, J.
Quantitative analysis of purine and pyrimidine metabolism in Chinese hamster ovary cells
DAREL HUNTING, JOYCE HORDERN, and J. FRANK HENDERSON 838

Hosein, E.A.
Synaptosomal Na^+,K^+-ATPase as a membrane probe in studying the *in vivo* action of morphine
OPHELIA WAN-KAN and E.A. HOSEIN 687

Hours, C.
The mechanism of replication of φX174 XVII. Purification and partial characterization of the gene A and A* proteins
LOUIS DUBEAU, CHRISTIAN HOURS, and DAVID T. DENHARDT 106

Hsu, F.-J.
Thermodynamics of lipid–protein associations: the enthalpy of binding of apo C-III to synthetic phosphatidylcholines
HENRY J. POWNALL, JOHN B. MASSEY, FU-JUAN HSU, and ANTONIO M. GOTTO, JR. 700

Huang, Y.S.
Cholesteryl sulfate: measurement with β-sitosteryl sulfate as an internal standard
Y.S. HUANG, K. EID, and J. DAVIGNON 602

Huber, R.E.
The anomeric specificity of β-galactosidase and *lac* permease from *Escherichia coli*
R.E. HUBER, K.L. HURLBURT, and C.L. TURNER 100

Hughey, R.P.
Rat renal γ-glutamyltransferase activity: a reaction of glutamine synthetase
FRANK W. BREGAR, REBECCA P. HUGHEY, and NORMAN P. CURTHOYS 54

Huner, N.P.A.
Comparison of the structure and function of ribulosebisphosphate carboxylase–oxygenase from a cold-hardy and nonhardy potato species
NORMAN P.A. HUNER, JIWAN P. PALTA, PAUL H. LI, and JOHN V. CARTER 280

Hunting, D.
Determination of deoxyribonucleoside triphosphates using DNA polymerase: a critical evaluation
DAREL HUNTING and J. FRANK HENDERSON 723

Hunting, D.
Effects of altered ribonucleotide concentrations on ribonucleotide reduction in intact Chinese hamster ovary cells
DAREL HUNTING, JOYCE HORDERN, and J. FRANK HENDERSON 821

Hunting, D.
Regulation of ribonucleotide reduction by deoxyribonucleotides in intact Chinese hamster ovary cells
DAREL HUNTING and J. FRANK HENDERSON 830

Hunting, D.
Quantitative analysis of purine and pyrimidine metabolism in Chinese hamster ovary cells
DAREL HUNTING, JOYCE HORDERN, and J. FRANK HENDERSON 838

Hurlburt, K.L.
The anomeric specificity of β-galactosidase and *lac* permease from *Escherichia coli*
R.E. HUBER, K.L. HURLBURT, and C.L. TURNER 100

Hurley, B.
Hydrolysis of triolein, cholesterol oleate, and 4-methylumbelliferyl stearate by acid and neutral ester hydrolases (lipases) from pigeon adipose tissue: effect of cAMP-dependent protein kinase
DAVID L. SEVERSON, THEA FLETCHER, GERALD GROVES, BRENDA HURLEY, and SHELLIE SLOAN 418

Huszti, Z.
Decreased protein synthesis in rats during a single short-term immobilization
ZSUZSANNA HUSZTI and AGNES KENESSEY 145

Hutchins, M.G.K.
Metabolism of N^G-monomethyl-L-arginine: formation of N^G-methylagmatine by *Escherichia coli* preparation
WOON KI PAIK, SANGDUK KIM, MARY GAIL KINZER HUTCHINS, and DANIEL SWERN 131

Hutchinson, J.C.
Effects of dietary protein on composition and turnover of apoproteins in plasma lipoproteins of rabbits
D.C.K. ROBERTS, M.E. STALMACH, M.W. KHALIL, J.C. HUTCHINSON, and K.K. CARROLL 642

Ilse, W.K.
Heterogeneity of VLDL triglyceride production by the liver and intestine
G. STEINER and W.K. ILSE 637

Isenman, D.E.
The use of diafiltration for the measurement of dialysable ligand binding to macromolecules: an examination of the theoretical parameters using concanavalin A in an Amicon cell
J.E. MARKS, D.E. ISENMAN, and R.H. PAINTER 893

Ishaque, A.
Erratum: The PO glycoprotein of peripheral nerve myelin
A. ISHAQUE, M.W. ROOMI, I. SZYMANSKA, S. KOWALSKI, and E.H. EYLAR 74

Ishaque, M.
Energy coupling mechanisms in host-grown *Mycobacterium lepraemurium*
M. ISHAQUE, C. ADAPOE, and L. KATO 75

Jay, E.
Tissue and species-specific effects of small molecular weight nuclear RNA's on transcription in isolated mammalian nuclei
WING-CHEONG LIU, ROSELINE GODBOUT, ERNEST JAY, KENNETH K.-Y. YU, and MARGARIDA O. KRAUSE 343

Jellinck, P.H.
Further purification and properties of rat uterine peroxidase
HUGH S. KEEPING, SHIOKO KIMURA, JANE LØVSTED, and PETER H. JELLINCK 916

Johnson, P.A.
Alterations in membrane permeability with trypsin treatment
P.A. JOHNSON and R.M. JOHNSTONE 668

Johnston, J.M.
The incorporation of choline into disaturated phosphatidylcholine in the microsomal, lamellar body, and surfactant fractions of hamster lung tissue
THOMAS J. DELAHUNTY and JOHN M. JOHNSTON 436

Johnstone, R.M.
Alterations in membrane permeability with trypsin treatment
P.A. JOHNSON and R.M. JOHNSTONE 668

Julien, P.
Composition and metabolism of very low density lipoproteins in dog cardiac lymph
P. JULIEN and A. ANGEL 709

Kasupski, G.J., Jr.
DNA binding of a nonstructural reovirus protein
IRIS H. SHELTON, GEORGE J. KASUPSKI, JR., COLETTE OBLIN, and ROGER HAND 122

Kasvinsky, P.J.
Regulation of the dephosphorylation of glycogen phosphorylase *a* and synthase *b* by glucose and caffeine in isolated hepatocytes
PETER J. KASVINSKY, ROBERT J. FLETTERICK, and NEIL B. MADSEN 387

Kato, L.
Energy coupling mechanisms in host-grown *Mycobacterium lepraemurium*
M. ISHAQUE, C. ADAPOE, and L. KATO 75

Kaur, H.
Regulation of the activity of a calcium-activated neutral protease during differentiation of skeletal myoblasts
HARJEET KAUR and BISHNU D. SANWAL 743

Keates, R.A.B.
Stabilization of microtubule protein in glycerol solutions
R.A.B. KEATES 353

Keates, R.A.B.
Inhibition of microtubule polymerization by the tubulin–colchicine complex: inhibition of spontaneous assembly
R.A.B. KEATES and G.B. MASON 361

Keeping, H.S.
Further purification and properties of rat uterine peroxidase
HUGH S. KEEPING, SHIOKO KIMURA, JANE LØVSTED, and PETER H. JELLINCK 916

Kenessey, A.
Decreased protein synthesis in rats during a single short-term immobilization
ZSUZSANNA HUSZTI and AGNES KENESSEY 145

Keough, K.M.W.
Lipid composition of lung and lung lavage fluid from map turtles (*Malaclemys geographica*) maintained at different environmental temperatures
MING-JARM LAU and KEVIN M.W. KEOUGH 208

Khalil, M.W.
Effects of dietary protein on composition and turnover of apoproteins in plasma lipoproteins of rabbits
D.C.K. ROBERTS, M.E. STALMACH, M.W. KHALIL, J.C. HUTCHINSON, and K.K. CARROLL 642

Kim, S.
Metabolism of N^G-monomethyl-L-arginine: formation of N^G-methylagmatine by *Escherichia coli* preparation
WOON KI PAIK, SANGDUK KIM, MARY GAIL KINZER HUTCHINS, and DANIEL SWERN 131

Kimura, S.
Further purification and properties of rat uterine peroxidase
HUGH S. KEEPING, SHIOKO KIMURA, JANE LØVSTED, and PETER H. JELLINCK 916

Kiss, G.B.
Oligo(A)-stimulated *Tetrahymena* rDNA synthesis *in vitro*
PETER R. GANZ, GYORGY B. KISS, and RONALD E. PEARLMAN 396

Kluger, R.
Inhibition of bacterial D-3-hydroxybutyrate dehydrogenase by substrates and substrate analogues
RONALD KLUGER and WING-CHEONG TSUI 810

Knull, H.R.
Interaction of muscle glycolytic enzymes with thin filament proteins
W.W. BRONSTEIN and H.R. KNULL 494

Kowalski, S.
Erratum: The PO glycoprotein of peripheral nerve myelin
A. ISHAQUE, M.W. ROOMI, I. SZYMANSKA, S. KOWALSKI, and E.H. EYLAR 74

Krause, B.R.
Plasma lipids, lipoproteins, and triglyceride turnover in eu- and hypo-thyroid rats and rats on a hypocaloric diet
LADISLAV DORY, BRIAN R. KRAUSE, AND PAUL S. ROHEIM 715

Krause, M.O.
Tissue and species-specific effects of small molecular weight nuclear RNA's on transcription in isolated mammalian nuclei
WING-CHEONG LIU, ROSELINE GODBOUT, ERNEST JAY, KENNETH K.-Y. YU, and MARGARIDA O. KRAUSE 343

Krul, E.S.
Secretion of nascent lipoproteins by isolated rat hepatocytes
ELAINE S. KRUL, PETER J. DOLPHIN, and DAVID RUBINSTEIN 676

Kuksis, A.
Differential distribution of sphingomyelins among plasma lipoprotein classes
J.J. MYHER, A. KUKSIS, W.C. BRECKENRIDGE, and J.A. LITTLE 626

Kuksis, A.
Modulation of acylglycerol synthetase activities of rat intestinal mucosa by homogenization and sonication
F. MANGANARO and A. KUKSIS 736

Kung, S.D.
Chloroplast deoxyribonucleic acid isolation: purity achieved without nuclease digestion
PATSY R. RHODES and S.D. KUNG 911

Kwan, C.-Y.
L-Phenylalanine induced changes of sulfhydryl reactivity in rabbit muscle pyruvate kinase
CHIU-YIN KWAN and ROBERT C. DAVIS 92

Kwok, S.-C.
Cell-free ammonia-oxidizing system of *Nitrosomonas europaea*: general conditions and properties
ISAMU SUZUKI, SIU-CHUN KWOK, USHA DULAR, and D.C.Y. TSANG 477

Kwok, S.-C.
A partial resolution and reconstitution of the ammonia-oxidizing system of *Nitrosomonas europaea*: role of cytochrome c_{554}
ISAMU SUZUKI and SIU-CHUN KWOK 484

Lane, B.G.
"Cap" sequences in poly(A)-rich RNA from dry wheat embryos
BYRON G. LANE 868

Lau, M.-J.
Lipid composition of lung and lung lavage fluid from map turtles (*Malaclemys geographica*) maintained at different environmental temperatures
MING-JARM LAU and KEVIN M.W. KEOUGH 208

Laughrea, M.
Differential effects of ethanol and the *rpsL1* (*strA1*) ribosomal mutation on the synthesis of an unusual protein coded by bacteriophages R17 and MS2 RNA
MICHAEL LAUGHREA 799

Laurence, H.
Effect of Δ^9-tetrahydrocannabinol on cyclic nucleotides in synchronously dividing *Tetrahymena*
SELMA ZIMMERMAN, ARTHUR M. ZIMMERMAN, and HELEN LAURENCE 489

Lazarus, H.M.
Recovery of nucleotide levels after cell injury
C. TERRY WARNICK and HARRISON M. LAZARUS 116

Lazier, C.B.
Differential ontogeny of estrogen responsiveness in the chick embryo liver
A. ELBRECHT, D.L. WILLIAMS, M.-L. BLUE, and C.B. LAZIER 606

Leblanc, R.M.
Interactions of CF_1, the coupling factor of photophosphorylations, with chloroplast lipids. Monolayers studies
HUGUETTE DIJKMANS, GAÉTAN MUNGER, JACQUES AGHION, and ROGER M. LEBLANC 328

Letendre, E.D.
A sensitive and convenient assay procedure for transferrin and its application to the purification of mouse transferrin
ELAINE D. LETENDRE and BRUCE E. HOLBEIN 906

Li, P.H.
Comparison of the structure and function of ribulosebisphosphate carboxylase–oxygenase from a cold-hardy and nonhardy potato species
NORMAN P.A. HUNER, JIWAN P. PALTA, PAUL H. LI, and JOHN V. CARTER 280

Lima, M.S.
Regulation of the F_1-ATPase from mitochondria of *Vigna sinensis* (L.) Savi cv. Pitiuba by spermine, spermidine, putrescine, Mg^{2+}, Na^+, and K^+
HORST W. PETER, MOEMA RODRIGUES PINHEIRO, and MARIA SILVA LIMA 60

Lingwood, C.
Tissue distribution of sulfolipids in the rat. Restricted location of sulfatoxygalactosylacylalkylglycerol
CLIFFORD LINGWOOD, GENEVIEVE HAY, and HARRY SCHACHTER 556

Little, B.W.
Partial purification and characterization of the components of the neutral ribonuclease II – inhibitor system of normal and dystrophic mouse skeletal muscle
BRIAN W. LITTLE and WILLIAM L. MEYER 220

Little, J.A.
Differential distribution of sphingomyelins among plasma lipoprotein classes
J.J. MYHER, A. KUKSIS, W.C. BRECKENRIDGE, and J.A. LITTLE 626

Liu, W.-C.
Tissue and species-specific effects of small molecular weight nuclear RNA's on transcription in isolated mammalian nuclei
WING-CHEONG LIU, ROSELINE GODBOUT, ERNEST JAY, KENNETH K.-Y. YU, and MARGARIDA O. KRAUSE 343

Loewen, P.C.
Effect of glutathione deficiency on the pool of CoA–glutathione mixed disulfide in *Escherichia coli*
PETER C. LOEWEN 379

Lohmeier, E.
Cloning and expression of the fumarate reductase gene of *Escherichia coli*
ELKE LOHMEIER, D. SCOTT HAGEN, PETER DICKIE, and JOEL H. WEINER 158

Lott, J.N.A.
Temperature-induced changes in nuclear pore complex frequencies, nuclear envelope surface areas, and nuclear volumes in light-synchronized *Euglena*
JOHN S. GREENWOOD and JOHN N.A. LOTT 802

Løvsted, J.
Further purification and properties of rat uterine peroxidase
HUGH S. KEEPING, SHIOKO KIMURA, JANE LØVSTED, and PETER H. JELLINCK 916

Lowden, J.A.
A structural difference between the β-chains in hexosaminidase B and hexosaminidase A
D. MAHURAN and J.A. LOWDEN 237

Lund, K.D.
Purification and some properties of the hemolytic toxin aerolysin
J. THOMAS BUCKLEY, L. NICOLE HALASA, KAREN D. LUND, and SHEILA MACINTYRE 430

MacIntyre, S.
Purification and some properties of the hemolytic toxin aerolysin
J. THOMAS BUCKLEY, L. NICOLE HALASA, KAREN D. LUND, and SHEILA MACINTYRE 430

Mack, E.Y.W.
Purification of liver cytosolic proteins that stimulate triacylglycerol synthesis
DANIEL A.K. RONCARI and ESTHER Y.W. MACK 944

Madsen, N.B.
Regulation of the dephosphorylation of glycogen phosphorylase *a* and synthase *b* by glucose and caffeine in isolated hepatocytes
PETER J. KASVINSKY, ROBERT J. FLETTERICK, and NEIL B. MADSEN 387

Magill, C.W.
Changes in nucleotide pools conidial germination in *Neurospora crassa*
RICHARD L. SABINA, PAULETTE DALKE, ALAN R. HANKS, JANE M. MAGILL, and CLINT W. MAGILL 899

Magill, J.M.
Changes in nucleotide pools conidial germination in *Neurospora crassa*
RICHARD L. SABINA, PAULETTE DALKE, ALAN R. HANKS, JANE M. MAGILL, and CLINT W. MAGILL 899

Mahuran, D.
A structural difference between the β-chains in hexosaminidase B and hexosaminidase A
D. MAHURAN and J.A. LOWDEN 237

Manganaro, F.
Modulation of acylglycerol synthetase activities of rat intestinal mucosa by homogenization and sonication
F. MANGANARO and A. KUKSIS 736

Marks, J.E.
The use of diafiltration for the measurement of dialysable ligand binding to macromolecules: an examination of the theoretical parameters using concanavalin A in an Amicon cell
J.E. MARKS, D.E. ISENMAN, and R.H. PAINTER 893

Marsh, J.B.
Hepatic and intestinal contribution of two forms of apolipoprotein B to plasma lipoprotein fractions in the rat
CHARLES E. SPARKS, OLCH HNATIUK, and JULIAN B. MARSH 693

Mason, G.B.
Inhibition of microtubule polymerization by the tubulin–colchicine complex: inhibition of spontaneous assembly
R.A.B. KEATES and G.B. MASON 361

Massey, J.B.
Thermodynamics of lipid–protein associations: the enthalpy of binding of apo C-III to synthetic phosphatidylcholines
HENRY J. POWNALL, JOHN B. MASSEY, FU-JUAN HSU, and ANTONIO M. GOTTO, JR. 700

Mbikay, M.
Inhibition of initiation of protein synthesis by tosyl-L-lysyl chloromethyl ketone
MAJAMBU MBIKAY and MICHAEL D. GARRICK 321

McKellar, R.C.
Isolation and characterization of a FAD-dependent NADH diaphorase from *Methanospirillum hungatei* strain GP1
R.C. MCKELLAR, K.M. SHAW, and G.D. SPROTT 83

McLennan, I.
Activation and inactivation of acetylcholinesterase by metal ions
G. TOMLINSON, B. MUTUS, and I. MCLENNAN 728

Meighen, E.
Fatty acid reductase in bioluminescent bacteria. Resolution from aldehyde reductases and characterization of the aldehyde product
DENIS RIENDEAU and EDWARD MEIGHEN 440

Menon, I.A.
Binding of protoporphyrin to melanin and oxidation–reduction properties of melanin–protoporphyrin complex
S. PERSAD, H.F. HABERMAN, and I.A. MENON 269

Meyer, W.L.
Partial purification and characterization of the components of the neutral ribonuclease II – inhibitor system of normal and dystrophic mouse skeletal muscle
BRIAN W. LITTLE and WILLIAM L. MEYER 220

Miki, B.L.A.
Nuclease sensitivity of postreplicated chromatin from Ehrlich ascites tumour cells
BRIAN L.A. MIKI, JOHN J. HEIKKILA, and IAN R. BROWN 22

Millward, S.
Similar sets of terminal oligonucleotides from reovirus double-stranded RNA and viral messenger RNA synthesized *in vitro*
KENNETH E.M. HASTINGS and STEWART MILLWARD 151

Misra, R.P.
Presence of γ-glutamyltransferase in the renal microvascular compartment
P.D. DASS, R.P. MISRA, and T.C. WELBOURNE 383

Mizrahi, L.
A new mitogenic D-galactosephilic lectin isolated from seeds of the coral-tree *Erythrina corallodendron*. Comparison with *Glycine max* (soybean) and *Pseudomonas aeruginosa* lectins
N. GILBOA-GARBER and L. MIZRAHI 315

Moller, F.
Control of fat cell phosphatidate phosphohydrolase by lipolytic agents
F. MOLLER, K.H. WONG, and P. GREEN 9

Morse, G.A.
Regulation of enzyme activity in the hibernator. A kinetic and spectroscopic study of muscle pyruvate kinase from the Arctic ground squirrel
GEORGE A. MORSE and HANS W. BEHRISCH 762

Munger, G.
Interactions of CF_1, the coupling factor of photophosphorylations, with chloroplast lipids. Monolayers studies
HUGUETTE DIJKMANS, GAETAN MUNGER, JACQUES AGHION, and ROGER M. LEBLANC 328

Mutus, B.
Activation and inactivation of acetylcholinesterase by metal ions
G. TOMLINSON, B. MUTUS, and I. MCLENNAN 728

Myher, J.J.
Differential distribution of sphingomyelins among plasma lipoprotein classes
J.J. MYHER, A. KUKSIS, W.C. BRECKENRIDGE, and J.A. LITTLE 626

Nadeau, D.
Extracellular alkaline phosphatase from alveolar secretions of patients with pulmonary alveolar proteinosis
DENIS NADEAU, MARK J. REASOR, and GARY E.R. HOOK 290

Neelin, J.M.
The similarity of histones from turtle erythrocytes and liver
R.G. RUTLEDGE, C.E. SHAY, G.L. BROWN, and J.M. NEELIN 273

Nettleton, J.A.
Exchange of free cholesterol between low density lipoproteins and human adipocytes
A. ANGEL, R. YUEN, and J.A. NETTLETON 655

Newhouse, N.
The nucleotide sequence of phenylalanine tRNA and 5S RNA from *Rhodospirillum rubrum*
N. NEWHOUSE, KRIKOR NICOGHOSIAN, and R.J. CEDERGREN 921

Nicoghosian, K.
The nucleotide sequence of phenylalanine tRNA and 5S RNA from *Rhodospirillum rubrum*
N. Newhouse, Krikor Nicoghosian, and R.J. Cedergren 921

Noël, S.-P.
Uptake of cholesterol from the very low density lipoprotein or its remnants by the perfused rat liver
Simon-Pierre Noël and David Rubinstein 447

Oblin, C.
DNA binding of a nonstructural reovirus protein
Iris H. Shelton, George J. Kasupski, Jr., Colette Oblin, and Roger Hand 122

Paik, W.K.
Metabolism of N^G-monomethyl-L-arginine: formation of N^G-methylagmatine by *Escherichia coli* preparation
Woon Ki Paik, Sangduk Kim, Mary Gail Kinzer Hutchins, and Daniel Swern 131

Painter, R.H.
The use of diafiltration for the measurement of dialysable ligand binding to macromolecules: an examination of the theoretical parameters using concanavalin A in an Amicon cell
J.E. Marks, D.E. Isenman, and R.H. Painter 893

Palcic, M.M.
Kinetic analysis of compound I formation and the catalatic activity of chloroperoxidase
Tsunehisa Araiso, Rick Rutter, Monica M. Palcic, Lowell P. Hager, and H. Brian Dunford 233

Palmer, F.B.St.C.
The phosphatidyl-*myo*-inositol-4,5-bisphosphate phosphatase from *Crithidia fasciculata*
F.B.St.C. Palmer 469

Palta, J.P.
Comparison of the structure and function of ribulosebisphosphate carboxylase–oxygenase from a cold-hardy and nonhardy potato species
Norman P.A. Huner, Jiwan P. Palta, Paul H. Li, and John V. Carter 280

Parry, D.M.
Renal metabolite concentrations and the activities of glutaminase and glutamate dehydrogenase during recovery from metabolic acidosis in the rat
David M. Parry, Beatrice Hall, and John T. Brosnan 871

Pawagi, A.B.
Vesicle surface charge and polylysine modification of ultraviolet absorption by the olefinic bonds in charged lipid
Asha B. Pawagi and I.M. Campbell 404

Pearlman, R.E.
Oligo(A)-stimulated *Tetrahymena* rDNA synthesis *in vitro*
Peter R. Ganz, Gyorgy B. Kiss, and Ronald E. Pearlman 396

Perras, D.
An investigation of the destruction of the β-lactam ring of penems by the albumin drug-binding site
H. Bruderlein, R. Daniel, D. Perras, A. DiPaola, A. Fidelia, and B. Belleau 857

Perry, M.B.
The specific capsular polysaccharide of *Streptococcus pneumoniae* type 9V
Malcolm B. Perry, Virginia Daoust, and Dennis J. Carlo 524

Persad, S.
Binding of protoporphyrin to melanin and oxidation-reduction properties of melanin–protoporphyrin complex
S. Persad, H.F. Haberman, and I.A. Menon 269

Peter, H.W.
Regulation of the F_1-ATPase from mitochondria of *Vigna sinensis* (L.) Savi cv. Pitiuba by spermine, spermidine, putrescine, Mg^{2+}, Na^+, and K^+
Horst W. Peter, Moema Rodrigues Pinheiro, and Maria Silva Lima 60

Phillips, H.M.
Isolation of size homogeneous preparations of high molecular weight and low molecular weight fibrinogens
Hannah M. Phillips 332

Pinheiro, M.R.
Regulation of the F_1-ATPase from mitochondria of *Vigna sinensis* (L.) Savi cv. Pitiuba by spermine, spermidine, putrescine, Mg^{2+}, Na^+, and K^+
Horst W. Peter, Moema Rodrigues Pinheiro, and Maria Silva Lima 60

Possmayer, F.
Pulmonary phosphatidic acid phosphohydrolase: further studies on the activities in rat lung responsible for the hydrolysis of membrane-bound and aqueously dispersed phosphatidate
Paul G. Casola and Fred Possmayer 500

Pownall, H.J.
Thermodynamics of lipid–protein associations: the enthalpy of binding of apo C-III to synthetic phosphatidylcholines
Henry J. Pownall, John B. Massey, Fu-Juan Hsu, and Antonio M. Gotto, Jr. 700

Ranadive, N.S.
Mast cell – lysosomal cationic protein interaction: effects of metabolic inhibitors and decay of activated cells on enhanced fluorescence of anilinonaphthalene sulfonate
Narendranath S. Ranadive and Deborah H. Ruben 202

Reasor, M.J.
Extracellular alkaline phosphatase from alveolar secretions of patients with pulmonary alveolar proteinosis
Denis Nadeau, Mark J. Reasor, and Gary E.R. Hook 290

Redman, C.M.
Site of synthesis of metallothionein in rat liver
M. George Cherian, Sharon Yu, and Colvin M. Redman 301

Rhodes, P.R.
Chloroplast deoxyribonucleic acid isolation: purity achieved without nuclease digestion
PATSY R. RHODES and S.D. KUNG 911

Richman, J.B.Y.
The optical properties of α_2-macroglobulin from normal and from cystic fibrosis plasma
JANICE B.Y. RICHMAN and JACOB A. VERPOORTE 519

Riddles, P.W.
Erratum: Jack bean urease (EC 3.5.1.5). V. On the mechanism of action of urease on urea, formamide, acetamide, *N*-methylurea, and related compounds
NICHOLAS E. DIXON, PETER W. RIDDLES, CARLO GAZZOLA, ROBERT L. BLAKELEY, and BURT ZERNER 564

Riendeau, D.
Fatty acid reductase in bioluminescent bacteria. Resolution from aldehyde reductases and characterization of the aldehyde product
DENIS RIENDEAU and EDWARD MEIGHEN 440

Roberts, D.C.K.
Effects of dietary protein on composition and turnover of apoproteins in plasma lipoproteins of rabbits
D.C.K. ROBERTS, M.E. STALMACH, M.W. KHALIL, J.C. HUTCHINSON, and K.K. CARROLL 642

Robichaud, B.
Further characterization of isolated presumptive euchromatin fractions of mouse hepatoma cells utilizing a cDNA probe complementary to the homologous poly(A)$^+$ mRNA
J.D. DUERKSEN, J.Y. CHAN, and B. ROBICHAUD 534

Rodriguez, A.
Interaction of selectively spin-labeled 70S ribosomes with $tRNA^{Phe}$. An electron paramagnetic resonance study
ANGEL RODRIGUEZ and HERMANN DUGAS 311

Roheim, P.S.
Plasma lipids, lipoproteins, and triglyceride turnover in eu- and hypo-thyroid rats and rats on a hypocaloric diet
LADISLAV DORY, BRIAN R. KRAUSE, AND PAUL S. ROHEIM 715

Romaschin, A.
The *in vivo* effects of 3-deoxy-3-fluoro-D-glucose metabolism on respiration in *Locusta migratoria*
A. ROMASCHIN and N.F. TAYLOR 262

Roncari, D.A.K.
Effects of phenobarbital upon triacylglycerol metabolism in the guinea pig
DAVID M. GOLDBERG, ALEXANDER YU, M. WAHEED ROOMI, and DANIEL A.K. RONCARI 48

Roncari, D.A.K.
Enzyme induction and hepatic glycerolipid synthesis in rats treated with 3-methylcholanthrene
D.M. GOLDBERG, M.W. ROOMI, A. YU, and D.A.K. RONCARI 793

Roncari, D.A.K.
Purification of liver cytosolic proteins that stimulate triacylglycerol synthesis
DANIEL A.K. RONCARI and ESTHER Y.W. MACK 944

Roomi, M.W.
Effects of phenobarbital upon triacylglycerol metabolism in the guinea pig
DAVID M. GOLDBERG, ALEXANDER YU, M. WAHEED ROOMI, and DANIEL A.K. RONCARI 48

Roomi, M.W.
Erratum: The PO glycoprotein of peripheral nerve myelin
A. ISHAQUE, M.W. ROOMI, I. SZYMANSKA, S. KOWALSKI, and E.H. EYLAR 74

Roomi, M.W.
Enzyme induction and hepatic glycerolipid synthesis in rats treated with 3-methylcholanthrene
D.M. GOLDBERG, M.W. ROOMI, A. YU, and D.A.K. RONCARI 793

Roufogalis, B.D.
Phospholipid and calmodulin activation of solubilized calcium-transport ATPase from human erythrocytes: regulation by magnesium
AMEERA AL-JOBORE and BASIL D. ROUFOGALIS 880

Rouleau, D.
Inhibition of anterior pituitary prostaglandin-stimulated adenylyl cyclase activity by somatostatin
DOMINIQUE ROULEAU and NICHOLAS BARDEN 307

Ruben, D.H.
Mast cell – lysosomal cationic protein interaction: effects of metabolic inhibitors and decay of activated cells on enhanced fluorescence of anilinonaphthalene sulfonate
NARENDRANATH S. RANADIVE and DEBORAH H. RUBEN 202

Rubinstein, D.
Uptake of cholesterol from the very low density lipoprotein or its remnants by the perfused rat liver
SIMON-PIERRE NOËL and DAVID RUBINSTEIN 447

Rubinstein, D.
Secretion of nascent lipoproteins by isolated rat hepatocytes
ELAINE S. KRUL, PETER J. DOLPHIN, and DAVID RUBINSTEIN 676

Rutledge, R.G.
The similarity of histones from turtle erythrocytes and liver
R.G. RUTLEDGE, C.E. SHAY, G.L. BROWN, and J.M. NEELIN 273

Rutter, R.
Kinetic analysis of compound I formation and the catalatic activity of chloroperoxidase
TSUNEHISA ARAISO, RICK RUTTER, MONICA M. PALCIC, LOWELL P. HAGER, and H. BRIAN DUNFORD 233

Sabina, R.L.
Changes in nucleotide pools conidial germination in *Neurospora crassa*
RICHARD L. SABINA, PAULETTE DALKE, ALAN R. HANKS, JANE M. MAGILL, and CLINT W. MAGILL 899

Sanwal, B.D.
Regulation of the activity of a calcium-activated neutral protease during differentiation of skeletal myoblasts
HARJEET KAUR and BISHNU D. SANWAL 743

Schachter, H.
Tissue distribution of sulfolipids in the rat. Restricted location of sulfatoxygalactosylacylalkylglycerol
CLIFFORD LINGWOOD, GENEVIEVE HAY, and HARRY SCHACHTER 556

Semple, D.J.
Effects of intravenous versus intragastric glucose pretreatment on triglyceride secretion by perfused livers of fed rats
D.J. SEMPLE and B.M. WOLFE 580

Severson, D.L.
Hydrolysis of triolein, cholesterol oleate, and 4-methylumbelliferyl stearate by acid and neutral ester hydrolases (lipases) from pigeon adipose tissue: effect of cAMP-dependent protein kinase
DAVID L. SEVERSON, THEA FLETCHER, GERALD GROVES, BRENDA HURLEY, and SHELLIE SLOAN 418

Shaw, D.H.
Isolation and characterization of 3-acetamido-3,6-dideoxy-L-glucose from the core oligosaccharides obtained from the aquatic gram-negative bacteria *Aeromonas hydrophila* and *Vibrio anguillarum*
JOSEPH H. BANOUB and DEREK H. SHAW 877

Shaw, K.M.
Isolation and characterization of a FAD-dependent NADH diaphorase from *Methanospirillum hungatei* strain GP1
R.C. MCKELLAR, K.M. SHAW, and G.D. SPROTT 83

Shay, C.E.
The similarity of histones from turtle erythrocytes and liver
R.G. RUTLEDGE, C.E. SHAY, G.L. BROWN, and J.M. NEELIN 273

Shelton, I.H.
DNA binding of a nonstructural reovirus protein
IRIS H. SHELTON, GEORGE J. KASUPSKI, JR., COLETTE OBLIN, and ROGER HAND 122

Sillers, P.J.
Analysis of chromosome movement in crane fly spermatocytes by ultraviolet microbeam irradiation of individual chromosomal spindle fibres. I. General results
PEGGY J. SILLERS and ARTHUR FORER 770

Sillers, P.J.
Analysis of chromosome movement in crane fly spermatocytes by ultraviolet microbeam irradiation of individual chromosomal spindle fibres. II. Action spectra for stopping chromosome movement and for blocking ciliary beating and myofibril contractions
PEGGY J. SILLERS and ARTHUR FORER 777

Sillers, P.J.
Addendum: Analysis of chromosome movement in crane fly spermatocytes by ultraviolet microbeam irradiation of individual chromosomal spindle fibres. II. Action spectra for stopping chromosome movement and for blocking ciliary beating and myofibril contractions
PEGGY J. SILLERS and ARTHUR FORER 867

Sloan, S.
Hydrolysis of triolein, cholesterol oleate, and 4-methylumbelliferyl stearate by acid and neutral ester hydrolases (lipases) from pigeon adipose tissue: effect of cAMP-dependent protein kinase
DAVID L. SEVERSON, THEA FLETCHER, GERALD GROVES, BRENDA HURLEY, and SHELLIE SLOAN 418

Smith, D.W.
Divalent cation-activated RNA synthesis in toluene-treated *Escherichia coli*
WILLIAM B. HELFMAN, SHELDON S. HENDLER, and DOUGLAS W. SMITH 511

Sparks, C.E.
Hepatic and intestinal contribution of two forms of apolipoprotein B to plasma lipoprotein fractions in the rat
CHARLES E. SPARKS, OLCH HNATIUK, and JULIAN B. MARSH 693

Sprott, G.D.
Isolation and characterization of a FAD-dependent NADH diaphorase from *Methanospirillum hungatei* strain GP1
R.C. MCKELLAR, K.M. SHAW, and G.D. SPROTT 83

Stalmach, M.E.
Effects of dietary protein on composition and turnover of apoproteins in plasma lipoproteins of rabbits
D.C.K. ROBERTS, M.E. STALMACH, M.W. KHALIL, J.C. HUTCHINSON, and K.K. CARROLL 642

Stein, O.
Metabolism of cytoplasmic triacylglycerol in cultured aortic smooth muscle cells
O. STEIN, G.A. COETZEE, and Y. STEIN 662

Stein, Y.
Metabolism of cytoplasmic triacylglycerol in cultured aortic smooth muscle cells
O. STEIN, G.A. COETZEE, and Y. STEIN 662

Steiner, G.
Heterogeneity of VLDL triglyceride production by the liver and intestine
G. STEINER and W.K. ILSE 637

Suzuki, I.
Cell-free ammonia-oxidizing system of *Nitrosomonas europaea*: general conditions and properties
ISAMU SUZUKI, SIU-CHUN KWOK, USHA DULAR, and D.C.Y. TSANG 477

Suzuki, I.
A partial resolution and reconstitution of the ammonia-oxidizing system of *Nitrosomonas europaea*: role of cytochrome c_{554}
ISAMU SUZUKI and SIU-CHUN KWOK 484

Swern, D.
Metabolism of N^G-monomethyl-L-arginine: formation of N^G-methylagmatine by *Escherichia coli* preparation
WOON KI PAIK, SANGDUK KIM, MARY GAIL KINZER HUTCHINS, and DANIEL SWERN 131

Szymanska, I.
Erratum: The PO glycoprotein of peripheral nerve myelin
A. ISHAQUE, M.W. ROOMI, I. SZYMANSKA, S. KOWALSKI, and E.H. EYLAR 74

Tanguay, R.M.
Biosynthesis and characterization of heat shock proteins in *Chironomus tentans* salivary glands
R.M. TANGUAY and M. VINCENT 67

Taylor, N.F.
The *in vivo* effects of 3-deoxy-3-fluoro-D-glucose metabolism on respiration in *Locusta migratoria*
A. ROMASCHIN and N.F. TAYLOR 262

Thibault, G.
Formation of angiotensin II by tonin from partially purified human angiotensinogen
C. GRISÉ, R. BOUCHER, G. THIBAULT, and J. GENEST 250

Thibault, G.
Purification and partial characterization of a plasma inhibitor of tonin
J. TREMBLAY, G. THIBAULT, J. GUTKOWSKA, R. BOUCHER, and J. GENEST 256

Tolnai, S.
Purification and some characteristics of a Ca^{2+}-activated proteolytic enzyme from beef cardiac muscle
SUSAN TOLNAI 242

Tomlinson, G.
Activation and inactivation of acetylcholinesterase by metal ions
G. TOMLINSON, B. MUTUS, and I. MCLENNAN 728

Tremblay, J.
Purification and partial characterization of a plasma inhibitor of tonin
J. TREMBLAY, G. THIBAULT, J. GUTKOWSKA, R. BOUCHER, and J. GENEST 256

Trip, E.
Semliki Forest virus does not inhibit phosphatidylcholine biosynthesis in BHK-21 cells
FREDERICK W. WHITEHEAD, EVERARD TRIP, and DENNIS E. VANCE 38

Tsang, D.C.Y.
Cell-free ammonia-oxidizing system of *Nitrosomonas europaea*: general conditions and properties
ISAMU SUZUKI, SIU-CHUN KWOK, USHA DULAR, and D.C.Y. TSANG 477

Tsoulis, C.J.
Factors affecting the 16α-hydroxylation of estrone 3-sulfate by guinea pig liver microsomes
C.J. TSOULIS and R. HOBKIRK 454

Tsui, W.-C.
Inhibition of bacterial D-3-hydroxybutyrate dehydrogenase by substrates and substrate analogues
RONALD KLUGER and WING-CHEONG TSUI 810

Tuchweber, B.
Changes in liver cell plasma membrane polypeptides of phalloidin-treated rats with special reference to the actomyosin complex
B. TUCHWEBER, R.J. VONK, and I.M. YOUSEF 165

Turner, C.L.
The anomeric specificity of β-galactosidase and *lac* permease from *Escherichia coli*
R.E. HUBER, K.L. HURLBURT, and C.L. TURNER 100

Vance, D.E.
Semliki Forest virus does not inhibit phosphatidylcholine biosynthesis in BHK-21 cells
FREDERICK W. WHITEHEAD, EVERARD TRIP, and DENNIS E. VANCE 38

Verdery, R.B.
Reverse cholesterol transport from fibroblasts to high density lipoproteins: computer solutions of a kinetic model
ROY B. VERDERY 586

Verpoorte, J.A.
The optical properties of α_2-macroglobulin from normal and from cystic fibrosis plasma
JANICE B.Y. RICHMAN and JACOB A. VERPOORTE 519

Vigne, J.-L.
Metabolism of apolipoprotein A-I of chylomicrons in rats and humans
JEAN-LOUIS VIGNE and RICHARD J. HAVEL 613

Vincent, M.
Biosynthesis and characterization of heat shock proteins in *Chironomus tentans* salivary glands
R.M. TANGUAY and M. VINCENT 67

Vonk, R.J.
Changes in liver cell plasma membrane polypeptides of phalloidin-treated rats with special reference to the actomyosin complex
B. TUCHWEBER, R.J. VONK, and I.M. YOUSEF 165

Wainwright, L.K.
The relationship between variations in levels of serotonin acetyltransferase activity and cGMP content in cultured chick pineal glands
S.D. WAINWRIGHT and LILLIAN K. WAINWRIGHT 593

Wainwright, S.D.
The relationship between variations in levels of serotonin acetyltransferase activity and cGMP content in cultured chick pineal glands
S.D. WAINWRIGHT and LILLIAN K. WAINWRIGHT 593

Walker, B.L.
Hepatic microsomal 3-hydroxy-3-methylglutaryl-CoA reductase activity in the lactating rat
BRIAN L. WALKER and PETER HAHN 889

Wan-Kan, O.
Synaptosomal Na^+,K^+-ATPase as a membrane probe in studying the *in vivo* action of morphine
OPHELIA WAN-KAN and E.A. HOSEIN 687

Warnick, C.T.
Recovery of nucleotide levels after cell injury
C. TERRY WARNICK and HARRISON M. LAZARUS 116

Weiner, J.H.
Cloning and expression of the fumarate reductase gene of *Escherichia coli*
ELKE LOHMEIER, D. SCOTT HAGEN, PETER DICKIE, and JOEL H. WEINER 158

Welbourne, T.C.
Presence of γ-glutamyltransferase in the renal microvascular compartment
P.D. DASS, R.P. MISRA, and T.C. WELBOURNE 383

Wellman, A.M.
Inhibition of adenine and hypoxanthine uptake by guanosine in conidia of *Neurospora crassa*
WENDA L. GREER and ANGELA M. WELLMAN 933

Whitehead, F.W.
Semliki Forest virus does not inhibit phosphatidylcholine biosynthesis in BHK-21 cells
FREDERICK W. WHITEHEAD, EVERARD TRIP, and DENNIS E. VANCE 38

Williams, D.L.
Differential ontogeny of estrogen responsiveness in the chick embryo liver
A. ELBRECHT, D.L. WILLIAMS, M.-L. BLUE, and C.B. LAZIER 606

Wolfe, B.M.
Effects of intravenous versus intragastric glucose pretreatment on triglyceride secretion by perfused livers of fed rats
D.J. SEMPLE and B.M. WOLFE 580

Wong, K.H.
Control of fat cell phosphatidate phosphohydrolase by lipolytic agents
F. MOLLER, K.H. WONG, and P. GREEN 9

Wyatt, G.R.
Production of lipophorin in the fat body of adult *Locusta migratoria*: comparison with vitellogenin
GERD GELLISSEN and G.R. WYATT 648

Yang, T.
Oxidation–reduction titration of cytochrome components in the electron transport chain of *Azotobacter vinelandii*
TSANYEN YANG 137

Yousef, I.M.
Changes in liver cell plasma membrane polypeptides of phalloidin-treated rats with special reference to the actomyosin complex
B. TUCHWEBER, R.J. VONK, and I.M. YOUSEF 165

Yu, A.
Effects of phenobarbital upon triacylglycerol metabolism in the guinea pig
DAVID M. GOLDBERG, ALEXANDER YU, M. WAHEED ROOMI, and DANIEL A.K. RONCARI 48

Yu, A.
Enzyme induction and hepatic glycerolipid synthesis in rats treated with 3-methylcholanthrene
D.M. GOLDBERG, M.W. ROOMI, A. YU, and D.A.K. RONCARI 793

Yu, K.K.-Y.
Tissue and species-specific effects of small molecular weight nuclear RNA's on transcription in isolated mammalian nuclei
WING-CHEONG LIU, ROSELINE GODBOUT, ERNEST JAY, KENNETH K.-Y. YU, and MARGARIDA O. KRAUSE 343

Yu, P.H.
Studies on the pargyline-binding site of different types of monoamine oxidase
PETER H. YU 30

Yu, S.
Site of synthesis of metallothionein in rat liver
M. GEORGE CHERIAN, SHARON YU, and COLVIN M. REDMAN 301

Yuen, R.
Exchange of free cholesterol between low density lipoproteins and human adipocytes
A. ANGEL, R. YUEN, and J.A. NETTLETON 655

Zalik, S.E.
The specificity of sialyltransferase activity in smooth membrane fractions of embryonic chicken liver
BRAD BENDIAK and SARA E. ZALIK 171

Zerner, B.
Erratum: Jack bean urease (EC 3.5.1.5). V. On the mechanism of action of urease on urea, formamide, acetamide, *N*-methylurea, and related compounds
NICHOLAS E. DIXON, PETER W. RIDDLES, CARLO GAZZOLA, ROBERT L. BLAKELEY, and BURT ZERNER 564

Zimmerman, A.M.
Effect of Δ^9-tetrahydrocannabinol on cyclic nucleotides in synchronously dividing *Tetrahymena*
SELMA ZIMMERMAN, ARTHUR M. ZIMMERMAN, and HELEN LAURENCE 489

Zimmerman, A.M.
Tubulin synthesis during the synchronous cell cycle of *Tetrahymena*
R. CURTIS BIRD and ARTHUR M. ZIMMERMAN 937

Zimmerman, S.
Effect of Δ^9-tetrahydrocannabinol on cyclic nucleotides in synchronously dividing *Tetrahymena*
SELMA ZIMMERMAN, ARTHUR M. ZIMMERMAN, and HELEN LAURENCE 489

Protein cartilage glycoprotein 181
Protein cationic neutrophil lysosome histamine 202
Protein chromosome movement spermatocyte fly 777
Protein diet lipoprotein apoprotein plasma 642
Protein formation bacteriophage genetics 799
Protein formation organ immobilization 145
Protein gene A bacteriophage phiX174 106
Protein glyceride formation stimulatory 944
Protein heat shock Chironomus salivary 67
Protein initiation lysyl chloromethyl ketone 321
Protein kinase activation lipase adipose 418
Protein ligand binding diafiltration 893
Protein microtubule stabilization glycerol 353
Protein reovirus binding DNA 122
Protein thin filament interaction enzyme muscle 494
Proteinase neutral calcium heart 242
Proteinosis pulmonary alveolar alk phosphatase 290
Proton transport GDP adipose cold 619
Protoporphyrin binding melanin redox 269
Pseudomonas hydroxybutyrate dehydrogenase inhibition 810
Pseudomys histone H1s liver erythrocyte 273
Pulmonary alveolar proteinosis alk phosphatase 290
Purine metab CHO cell 838
Purine nucleotide metab kidney ischemia 116
Pyrimidine metab CHO cell 838
Pyruvate kinase muscle Citellus 762
Pyruvate kinase sulfhydryl reactivity phenylalanine 92
Radioassay protein ligand binding 893
Radioassay transferrin 906
Redox melanin binding protoporphyrin 269
Redox potential cytochrome Azotobacter 137
Reductase fatty acid Photobacterium 440
Reductase fumarate gene cloning Escherichia 158
Reductase hydroxymethylglutaryl CoA liver lactation 889
Reovirus protein binding DNA 122
Reovirus RNA mRNA 151
Respiration adipose mitochondria cold adaptation 619
Respiration Locusta deoxyfluoroglucose metab 262
Respiration Mycobacterium 75
Review lipoprotein plasma coronary disease 565
Review succinyl CoA synthetase Escherichia 1
Rhodospirillum phenylalanine tRNA rRNA sequence 921
Ribonucleotide CHO deoxyribonucleotide regulation 821
Ribonucleotide redn CHO deoxyribonucleotide 830
Ribosome interaction phenylalanine tRNA 311
Ribulose diphosphate carboxylase structure potato 280
RNA cap sequence embryo wheat 868
RNA mRNA reovirus 151
RNA polymerase divalent cation 511

RNA small nuclear chromatin transcription 343
RNA translation error phage protein 799
RNase II inhibitor system muscle 220
rRNA coding DNA formation Tetrahymena 396
rRNA sequence Rhodospirillum 921
Salivary Chironomus heat shock protein 67
Semliki Forest virus infection phosphatidylcholine 38
Serotonin acetyltransferase pineal cGMP photoperiod 593
Shock heat protein Chironomus salivary 67
Sialyltransferase specificity liver chick embryo 171
Sitosteryl sulfate std cholesteryl sulfate detn 602
Small nuclear RNA chromatin transcription 343
Smooth muscle aorta glyceride metal 662
Somatostatin prostaglandin adenylate cyclase pituitary 307
Sonication glyceride formation intestine 736
Spermatocyte chromosome movement Nephrotoma UV 770 777
Spermatocyte chromosome movement Nephrotoma UV addn 867
Sphingomyelin distribution lipoprotein 626
Spindle UV irradn chromosome movement 770
Spindle UV irradn chromosome movement addn 867
Spore germination nucleotide pool Neurospora 899
Std sitosteryl sulfate cholesteryl sulfate detn 602
Steroid hydroxylase estrone sulfate hydroxylation 454
Streptococcus capsular polysaccharide repeating unit 524
Streptomycin phage protein genetics 799
Subunit crosslinked aspartate transcarbamoylase 461
Subunit structure succinyl CoA synthetase review 1
Succinyl CoA synthetase Escherichia review 1
Sulfatoxygalactosylacylalkylglycerol formation testis 556
Sulfhydryl reactivity pyruvate kinase phenylalanine 92
Sulfolipid formation organ 556
Surface charge phospholipid liposome 404
Surfactant lung lecithin formation 436
Surfactant lung turtle temp 208
Synaptosome membrane ATPase morphine 687
Synthase glycogen dephosphorylation regulation 387
Synthetase acylglycerol intestine 736
Synthetase glutamine kidney glutamyltransferase 54
Synthetase succinyl CoA Escherichia review 1
Temp Euglena cell nucleus 802
Temp lipid lung Malaclemys 208
Testis sulfatoxygalactosylacylalkylglycerol formation 556
Tetrahydrocannabinol cyclic nucleotide Tetrahymena 489
Tetrahymena cyclic nucleotide tetrahydrocannabinol 489
Tetrahymena rRNA coding DNA formation 396
Tetrahymena tubulin formation cell cycle 937
Thermodn apolipoprotein assocn lecithin 700
Thyroid hormone lipid plasma nutrition 715
TLC cholesteryl sulfate 602
Tonin angiotensin II formation angiotensinogen 250
Tonin inhibitor plasma 256
Transcarbamoylase aspartate crosslinked deriv conformation 371
Transcarbamoylase aspartate crosslinked subunit 461
Transcription chromatin small nuclear RNA 343
Transferrin purifn detn 906
Transport amino acid Ehrlich trypsin 668
Transport cholesterol fibroblast lipoprotein model 586
Transport cholesterol lipoprotein adipocyte 655
Transport cholesterol lipoprotein remnant liver 447
Transport nucleoside Neurospora 933
Transport proton GDP adipose cold 619
Triacylglycerol liver phenobarbital enzyme 48
Triphosphoinositide phosphatase Crithidia 469
tRNA phenylalanine interaction ribosome 311
tRNA phenylalanine sequence Rhodospirillum 921
Tropomyosin interaction glycolytic enzyme 494
Trypsin amino acid transport Ehrlich 668
Tubulin colchicine microtubule 361
Tubulin formation Tetrahymena cell cycle 937
Tubulin stabilization glycerol 353
Turtle histone H1s liver erythrocyte 273
Turtle phospholipid lung temp 208
Ultrafiltration protein ligand binding 893
Urease kinetics mechanism correction 564
Uterus peroxidase 916
UV chromosome movement spermatocyte Nephrotoma 770 777
UV chromosome movement spermatocyte Nephrotoma addn 867
UV phospholipid liposome 404
Very low density lipoprotein lymph 709
Vibrio acetamidodideoxyglucose oligosaccharide 877
Vigna mitochondria ATPase regulation polyamine 60
Virus reo protein binding DNA 122
Virus reo RNA mRNA 151
Virus Semliki Forest infection phosphatidylcholine 38
Vitellogenin fat body insect lipophorin 648
Wheat embryo RNA cap sequence 868
